I added a couple of dates to your time line.

The briefing went well. Carl suggested some community update, maybe end January to inform removal sampling results.

As far as your talking points no comments. The thing we need to be careful is that about the enforcement process, this is currently ongoing and cannot talk much at this time, except that we need to do this enforcement first as part of the process.

Bart & Lance

Sorry I can be at the briefing this morning. I have put together a time line and a few talking points on our activities. I'm sure I missed something on the time line. Could you please fill in points I have Missed. There is a large gap from 1996-2009 and I would like to fill that. Please let me know of events that took place during that period so I can develop a time line that is complete.

Please let me know of any other additions or deletions.

Thanks,
Bill
